Olympic Style Format - Teams Grouped By Strength

Four Phased Event Combines Pool Play and Single Elimination

3 Game Guarantee

ONLINE REGISTRATION WILL REMAIN OPEN THROUGH - July 4th

The League Championship uses an Olympic Style format that separates teams into two groups according to their relative strength. This format ensures a much more competitively balanced tournament and it gives teams in the lower grouping a realistic chance to advance to the finals and possibly win a League Championship. This format prevents teams from one side of the bracket playing teams from the other side until the final game of the tournament and it guarantees that a team from each side of the bracket qualifies for the championship game. Regular season results will be used both to place teams into competitive tiers (bracket sides) and to seed teams in pool play. The results of pool play then will be used to determine the teams that advance to the single elimination phase and to seed all single elimination brackets. The winner from each side of the bracket advances into the finals - a single elimination championship game.
